Vinogradi KNEBU Tomislavgrad / Knebu Winery Tomislavgrad

VISOKA NADMORSKA VISINA (965 METARA) DOPRINOSI INTENZIVNIJEM OKUSU I AROMI GROŽĐA ZBOG HLADNIJIH TEMPERATURA KOJE OMOGUĆUJU RAZVOJ RAZLIČITIH KARAKTERISTIKA POPUT MINERALNOSTI I PIKANTNOSTI TE VISOKIM KISELINAMA KOJE VINU PRUŽAJU SVJEŽINU I PRODUŽUJU NJEGOV VIJEK TRAJANJA. VELIKE OSCILACIJE U TEMPERATURI TIJEKOM DANA I NOĆI, INTENZIVNA UV ZRAČENJA I JAK VJETAR PREDSTAVLJAJU IZAZOVE S KOJIMA SE GROŽĐE SUSREĆE SVAKODNEVNO. OVI UVJETI ČESTO DOVODE DO MANJEG URODA, ALI KONCENTRIRANIJEG GROŽĐA S INTENZIVNIJIM OKUSIMA I AROMAMA. RADI POSTIZANJA I OČUVANJA VRHUNSKE KVALITETE VINA, PRINOS GROŽĐA SMANJUJE SE NA 1,0 KG PO TRSU. BERBA SE OBAVLJA RUČNO KRAJEM LISTOPADA, PAŽLJIVO BIRAJUĆI NAJBOLJE GROZDOVE, A NAKON TOGA SE GROŽĐE ODMAH PRERAĐUJE U VINARIJI. KNEBU VINA DUGO ODLEŽAVAJU U BAČVAMA VOLUMENA 500 I 225 LITARA OD FRANCUSKOG I SLAVONSKOG HRASTA.

THE HIGH ALTITUDE CONTRIBUTES (965 METERS) TO THE MORE INTENSE TASTE AND AROMA OF GRAPES, DUE TO COLDER TEMPERATURES THAT ENABLE THE DEVELOPMENT OF VARIOUS CHARACTERISTICS SUCH AS MINERALITY AND SPICINESS, AND TO HIGH LEVELS OF ACIDITY THAT GIVE THE WINE ITS FRESHNESS AND EXTEND ITS LIFESPAN.

LARGE FLUCTUATIONS IN TEMPERATURE DURING DAYS AND NIGHTS, INTENSE UV RADIATION AND STRONG WIND PRESENT THE CHALLENGES THAT GRAPES FACE DAILY. THESE CONDITIONS OFTEN LEAD TO LOWER YIELDS, BUT ALSO TO MORE CONCENTRATED GRAPES WITH MORE INTENSE FLAVORS AND AROMAS.

IN ORDER TO ACHIEVE AND PRESERVE THE SUPERIOR QUALITY OF WINE, THE YIELD OF GRAPES IS REDUCED TO 1.0 KG PER VINE. THE HARVEST IS DONE MANUALLY AT THE END OF OCTOBER, WITH CAREFUL SELECTION OF THE BEST GRAPES, AND AFTER THAT, THE GRAPES ARE IMMEDIATELY PROCESSED IN THE WINERY. KNEBU WINES AGE IN 500 AND 225 LITERS FRENCH AND SLAVONIAN OAK BARRELS FOR EXTENDED PERIODS OF TIME.
